

SpeedDome Optima

PROGRAMMABLE DOME CAMERAS

FEATURES

- Color camera with 16x optical zoom
- 450+ lines horizontal resolution
- Zoom adjusted programming
- Auto focus and auto iris
- Auto white balance
- Automatic gain control
- Line-lock
- Supports RS-422 /RS-485, Manchester, and SensorNet protocols
- Up to 96 user-definable presets
- Three user-definable patterns
- One alarm input
- One auxiliary output
- Indoor and outdoor versions
- Power-on functional tests
- LED diagnostics
- Easy to install and service
- Priced comparably to a PTZ, with more features and easier to install
- Stepper motors with micro-step control

SpeedDome Optima delivers the standard features of a programmable dome, but is priced comparably to a PTZ. This provides an alternative for customers who prefer the convenience and programmability of a dome camera, but previously considered domes to be price-prohibitive.

Choose from several innovative mounting options, including hard ceiling and 2x2 tile, as well as wall and pendant mounts (for both indoor and outdoor applications). And because the dome contains all of the necessary install components, installation is a breeze – just 15 minutes from box to ceiling for the hard ceiling mount. The dome's power-on diagnostics and functional tests assist with fault isolation during install and service.

The dome accommodates a variety of protocols, including RS-422/RS-485, Manchester and SensorNet, making it compatible with any American Dynamics controller or matrix switcher/ controller system.

The dome features a color camera with 16x optical zoom and 450+ TV lines resolution, providing a quality, high-resolution picture. The dome also provides user-programmable presets and patterns, and contains one alarm input and an auxiliary output.

FEATURES

- Integral 16x optical zoom and 450+ lines horizontal resolution provide a quality, high-resolution picture.
- Advanced third generation Digital Signal Processing (DSP) CCD camera delivers sharp, detailed images.
- Zoom Adjusted Program (ZAP) automatically adjusts pan and tilt speeds in proportion to zoom position, even at 16x magnification.
- Automatic white balance allows the camera to automatically adjust the white balance of the image, providing optimal image quality.
- The automatic focus provides clear images without the need for manual adjustments.
- The auto iris provides visible scenes without the user having to manually compensate for diverse lighting conditions.
- The dome's endcap or flying lead connection method makes the dome easy to install and service – as little as 15 minutes from box-to-ceiling.
- The dome is available in both indoor and outdoor versions.
- The dome supports up to 96 user-definable presets and three user-definable patterns.
- The dome incorporates an automatic flip feature. This feature enables the dome to automatically turn 180° when the camera tilts to its lower limits and stays in that position for a brief speed-proportional delay.
- Vertical sync phase adjustment is provided to help compensate for different phases of power when line-lock is enabled, making it ideal for single and multi-phase power installations.
- Surge protection.
- Alarms are processed externally by the controller, and can automatically call a preset, run a pattern, or activate an auxiliary output when the alarm is activated.
- The dome contains a series of diagnostic LEDs for power, communication, network type and failure mode.
- The fully isolated power supply helps eliminate ground loops.
- Sensing of 50/60 Hz line is automatic and does not require manual adjustment.

- Allows daisy chain configuration of control wiring.
 - For RS-422/RS-485: 10 domes at a maximum distance of 1 km (3,000 ft) on two 22 AWG shielded twisted pairs (STP).
 - For SensorNet: 32 devices at a maximum distance of 1 km (3,000 ft) on one 22 AWG unshielded twisted pair (UTP).
 - For Manchester: 3 domes at a maximum distance of 1.5 km (5,000 ft) on one 18 AWG shielded twisted pair (STP).

Two Housing Options

The integral housing model, which is constructed of ABS plastic, is suitable for both indoor and outdoor applications. This model incorporates a flying lead connection for mechanical and electrical cabling. The outdoor version of the integral housing model is weather and tamper-proof, and contains a heater/blower that protects the dome. In extreme temperatures, the housing's built-in fan prevents the dome from overheating, and the built-in thermostat and heater prevent ice from forming on the outside bubble.

The in-ceiling model is designed with an integrated aluminum top hat enclosure and plenum cap with swing-out tabs that grasp ceiling material, ensuring a secure and easy installation. This model utilizes a endcap connection for mechanical and electrical cabling. The in-ceiling model is for indoor applications only.

Integral Housing Model

In-Ceiling Model

SPECIFICATIONS

Operational

Manual Pan/Tilt Speed	1° to 50° per second (based on zoom position)
Preset Pan/Tilt Speed	100° per second, maximum
Pan Travel	360° continuous
Tilt Travel	> 90°
Pan/Tilt Accuracy	± 0.5°
Zoom/Focus Accuracy	± 0.5%
Optical Zoom	16X
Bubble Density	Clear (f0.0) or smoked (f1.0)

Programmable Presets

Controller	SensorNet	Manchester	RS-422
ADTT16E	96	N/A	N/A
ADTT16E via RCSN422	N/A	N/A	4

Programmable Patterns	3
Auto Synchronization	
Line-Locked	Remote V-phase adjustment
Internal	Built-in sync generator
Address Range	
RS-422/RS-485	1 to 99
Manchester	1 to 64
SensorNet	1 to 255
Alarm Inputs	1
Auxiliary Relay Outputs	1

Electrical

Input Voltage	24 to 30 VAC, Class 2 LPS
Design Tolerance	16 to 36 VAC
Line Frequency	50/60 Hz
Power Consumption	
Indoor	21 watts maximum
Outdoor	80 watts maximum
Power-on In-rush current	.3 amps
Allowable Drop-out	.33 ms
Surge Protection	
Video	Low-capacitance Zener suppressor of 6.5 V, 1500 watts

SensorNet/Manchester	Isolation transformer coupled, 2000 Vrms; PTC resettable fuse protects transformer; TVS rated at 5.6 V, 40 A, 0.1 joules; 10 kA impulse rated gas tube, 8/20 µsec impulse
RS-422/RS-485	Series resistors of 33 Ω; TVS rated at 5.6 V, 40 A, 0.1 joules
Alarm Input	Series resistors of 33 Ω; TVS rated at 5.6 V, 40 A, 0.1 joules
Auxiliary Output	100 V isolation form 1-C relay
Power Line	TVS rated at 60 V, 250 A, 1.5 joules; 10 kA impulse rated gas tube, 8/20 µsec impulse

Camera

Imager	Interline transfer 1/4 inch CCD array
Scanning System	2:1 interlace
Video Output	1.0 Vp-p, 75 Ω composite
S/N Ratio	48 dB (typical)
Horizontal Resolution	>450 lines at center
Minimum Illumination	1.5 lux (20 IRE, AGC on)
Gain Control	Automatic (AGC)
White Balance	Through the Lens (TTL) Automatic Tracing White Balance (ATW)

NTSC

Pickup Device	768 (H) x 494 (V) pixels
Scanning	525 lines, 60 fields, 30 frames
Horizontal	15.734 kHz
Vertical	59.9 Hz

PAL

Pickup Devices	752 (H) x 582 (V) pixels
Scanning	625 lines, 50 fields, 25 frames
Horizontal	15.625 kHz
Vertical	50 Hz

Lens

Design	Aspherical
Focal Length	4 to 64 mm
Aperture	f1.4 (wide), f2.2 (tele)
4 mm	47.0° (H) x 35.2° (V)
64 mm	3.0° (H) x 2.25° (V)

Field of View Formulas

Horizontal View	= (.8 x A) / B
Vertical View	= (.6 x A) / B
A	= distance from camera in meters or feet
B	= zoom power (e.g. 1-16x)
